Massive response to highways survey - Thank you

I, along with my fellow Liberal Democrat councillors and campaigners, am still going through the hundreds of replies, and the many items of casework, but I am pleased to share with you the results from the first one thousand we have analysed from across Hertfordshire. **A summary of the key results is overleaf.**

It is clear there is widespread concern. The majority of you are dissatisfied with highways maintenance and you want permanent repairs done rather than short term fixes. It's also heartening to know the majority of you support a greener Hertfordshire, with more tree planting and wildflower verges being important.

I believe it is vital that our area has a safe, efficient and high-quality local transport system. We need safe roads and proper provision for pedestrians and cyclists - not just for our quality of life, but to support our economic recovery after Covid and help tackle climate change too. Sadly the county council's Conservative leaders have failed to deliver the service we deserve.

The County Council elections next year give everyone an opportunity to change the way things are done. If the Liberal Democrats were running the county council they would:

- Prioritise removing overgrown vegetation from footways and cycle routes.
- Improve the maintenance of our pavements - to encourage walking.
- Change the way blocked drains are dealt with so they are not ignored!
- Improve cycling infrastructure and maintain existing routes.
- Implement 20mph areas where they are needed and wanted.
- Plant more trees and have more wildflower verges.

We can, and with your help will, improve Hertfordshire so it is **a fairer, greener and a healthier place.**

Yours Sincerely,

Nigel Taylor

**And your Berkhamsted
Liberal Democrat Team**
